

GIBBONS

PRECAST CONCRETE BOLLARDS

Gibbons precast concrete bollards provide an effective, permanent and unobtrusive means of defining vehicle aisle and entries and protecting buildings, gardens, etc. from vehicle damage.

Size: Gibbons manufacture precast concrete bollards in two sizes:

- Type A 460mm high
- Type B 1000mm high

Specifications:

Concrete Strength: 20 Mpa

Surface Finish: Smooth steel formed surface ready for painting

Height: Type A - 450mm
Type B - 990mm

Base Diameter: Type A - 350mm
Type B - 585mm

Type B bollards are manufactured with a swift lift insert on the top.

Supply: Both sizes are available for immediate delivery

Installation: Simple and effective installation techniques enable units to be readily incorporated into new and existing developments.
